2 Important

Read this user manual carefully before you use the appliance, and save it for future reference

Danger

. The appliance must not be immersed in water, nor rinsed under the tap.

Warning

- · Check if the voltage indicated on the appliance corresponds to the local power voltage before vou connect it.
- . The appliance is intended to be used in household or similar applications such as:

- staff kitchen areas in shops, offices, and other residential type environments;
- · farm houses;

88:88

- · by clients in hotels, motels and other residential type environments:
- . This appliance is not intended for use by persons (including children) with reduced physical, sensory or mental capabilities, or lack of experience and knowledge, unless they have been given supervision or instruction concerning use of the appliance by a person responsible for their safety.
- Children should be supervised to ensure that they do not play with the appliance.

- · If the power cord set is damaged, it must be replaced by a cord set available from the manufacturer.
- . The appliance is not intended to be operated by means of an external timer control system.
- . The ducts in the pressure regulator allowing the escape of steam should be checked regularly to ensure that they are not blocked.
- . The container must not be opened until the pressure has decreased sufficiently.
- · Cleaning and user maintenance shall not be made by children.
- · Keep the appliance and its cord out of reach of children.

- · WARNING: Always follow the instructions and use the appliance properly to avoid potential injury.
- · WARNING: Make sure to avoid spillage on the power connector to avoid a potential hazard.
- the heating element is subject to residual heat after use.
- Use clean and soft cloth to clean the surfaces in contact with food.
- Only connect the appliance to a grounded power outlet. Always make sure that the plug is inserted firmly into the power outlet.

Do not use the appliance if the plug, the power cord, the inner pot, the sealing ring, or the main body is damaged.

88:88

- · Do not let the power cord hang over the edge of the table or worktop on which the appliance stands.
- . Make sure the heating element, the temperature sensor, and the outside of the inner pot are clean and dry before you put the plug in the power outlet.
- . Do not plug in the appliance or turn the control knob with wet hands.
- · Make sure the power socket is clean and dry before you plug in the appliance.

bed and breakfast or a separate remote-· CAUTION: Surface of type environments.

- . Do not place the inner pot directly over an open fire to cook food.
- Do not use the inner pot if it is deformed.
- . Make sure that the sealing ring is clean and in good condition.
- The accessible surfaces may become hot when the appliance is operating. Take extra caution when touching the surfaces.
- Beware of hot steam coming out of the floating valve and pressure regulator valve during cooking or when you open the lid. Keep hands and face away from the appliance to avoid the steam.
- Do not lift and move the appliance while it is operating.
- Do not exceed the maximum water level indicated in the inner pot to prevent overflow.
- . Do not place the cooking utensils inside the pot while cooking
- Only use the cooking utensils provided. Avoid using sharp utensils.
- To avoid scratches, it is not recommended to cook ingredients with crustaceans and shellfish. Remove the hard shells before cooking.
- Do not place a magnetic substance on the lid. Do not use the appliance near a magnetic substance.
- · Always let the appliance cool down to room temperature before you clean or move it.
- Always clean the appliance after use. Do not clean the appliance in dishwasher.

- · Always unplug the appliance if not used for a longer period.
- . If the appliance is used improperly or for professional or semi-professional purposes, or if it is not used according to the instructions in this safety leaflet, the guarantee becomes invalid and Philips refuses liability for any damage caused.
- Visit www.philips.com/ support to download the user manual.

Electromagnetic fields (EMF)

This Philips appliance complies with all applicable standards and regulations regarding exposure to electromagnetic fields.

4 Using the electric pressure cooker

Before first use

- 1 Remove all packaging materials from the
- 2 Take out all the accessories from the inner pot
- 3 Clean the parts of the electric pressure cooker thoroughly before using it for the first time (see chapter 'Cleaning and Maintenance').

Make sure all parts are completely dry before you start using the electric pressure cooker

Preparations before cooking (fig. 2)

Before using the electric pressure cooker to cook food, follow below preparation steps:

- 1 Hold the lid handle and turn it anti-clockwise until the top lid cannot move any more, then lift
- 2 Take out the inner pot from the electric pressure cooker and put the pre-washed food in the inner
- 3 Wipe the outside of the inner pot dry, then put it back into the electric pressure cooker.
- 4 Place the top lid onto the electric pressure cooker and turn it clockwise. You will hear a "click" sound when the top lid is properly locked.

- Make sure the sealing ring is properly assembled around the edge of the detachable
- Make sure the pressure regulator valve and floating valve are clean and not blocked.
- Make sure the outside of the inner pot is dry and clean, and that there is no foreign residue on the heating elemen
- Make sure the inner pot is in proper contact with the heating element.

Cooking food (fig. 3)

Note

- Do not fill the inner pot with less than 1/3 or more than 2/3 full of food and liquid
- For food that expands during cooking, do not fill the inner pot with more than 1/2 full of food and liquid.
- For rice cook indications on the inside of the inner pot. You can adjust the water level for different types of rice and according to your own preference. Do not exceed the maximum quantities indicated on the inside of the inner pot.
- Make sure the floater on the top lid drops down before cooking
- After the cooking process is started, you can press Cancel/Warm to deactivate the current work, and the appliance goes to standby mode

Pressure cooking

- 1 Follow the steps in "Preparations before cooking'
- 2 Turn the pressure regulator to seal.
- 3 Put the plug in the power socket. → The power indicator starts flashing
- 4 Press Pressure cook to choose one of the pressure cooking functions - Soup, Risotto, Rice, Steam, Meat/Poultry or Manual.
- → The default pressure keeping time is displayed on the screen.

The pressure keeping time is not adjustable for Risotto and Rice.

- Do not disassemble the pressure regulator during cooking. Always unplug the electric pressure cooker and wait until the pressure has been released sufficiently to do so.
- · To disassemble the pressure regulator:
- 1 Turn the lower screw anticlockwise until it becomes loose
- 2 Pull it up and take out the pressure regulator
- To assemble the pressure regulator:
- 1 Assemble the lower screw back to the regulator 2 Make sure the regulator points at the sealed
- position () and put it back to the steam valve.
- 3 Turn the screw clockwise until it is fastened.

5 Cleaning and **Maintenance**

Note

- Unplug the electric pressure cooker before starting to clean it.
- Wait until the electric pressure cooker has cooled down sufficiently before cleaning it.

Interior

Inside of the top lid and the main body:

- · Wipe with wrung out and damp cloth. Make sure to remove all the food residues stuck to the electric pressure cooker.
- Heating element: · Wipe with wrung out and damp cloth.
- Remove food residues with wrung out and damp cloth.

Sealing ring

- · Soak in warm water and clean with sponge. Inner lid:
- · Remove the detachable inner lid. Soak it in warm water and clean with sponge

Exterior

Surface of the top lid and outside of the main

- · Wipe with a cloth damped with soap water. · Only use soft and dry cloth to wipe the control
 - panel. Make sure to remove all the food residues
 - around the pressure regulator valve and floating valve.

Pressure regulator valve and floating valve:

- · Disassemble the pressure regulator, soak it in warm water, and clean with sponge.
- Remove food residues in the pressure regulator valve and floating valve.

Accessories

Measuring cup, rice & soup ladle, and inner pot:

· Soak in hot water and clean with sponge

6 Specifications

Model Number	HD2237
Rated power output	1190-1415W
Rated capacity	6.0L
Warm keeping temperature	60-80°C

Always unplug the appliance if not used for a longer period

7 Recycling

Do not throw away the product with the normal household waste at the end of its life, but hand it in at an official collection point for recycling. By doing this, you help to preserve the environment Follow your country's rules for the separate collection of electrical and electronic products. Correct disposal helps prevent negative consequences for the environment and human

8 Guarantee and service

If you need service or information, or if you have a problem, visit the Philips website at www.philips.com or contact the Philips Custome Care Center in your country. You can find its phone number in the worldwide guarantee leaflet. If there is no Customer Care Center in your country, go to your local Philips dealer.

9 Troubleshooting

If your electric pressure cooker does not function properly or if the cooking quality is insufficient, consult the table below. If you are unable to solve the problem, contact a Philips service center or the Consumer Care Center in your country

Problem	Cause	Solution
I have difficulties opening the lid after cooking.	Need to release the pressure.	Set the pressure control valve to 'Vent'. And wait until the floater has dropped.
	Floater stuck in up position.	Set the pressure control valve to 'Vent'. And wait until the floater has dropped.
I have difficulties closing the top lid.	The sealing ring is not well assembled.	Make sure the sealing ring is well assembled around the inside of the top lid.
	The floater stuck in up position.	The floater blocks the locking pin. Push down the floater so that it does not block the locking pin.
	Sealing ring missing.	Sealing ring Inner lid Put sealing ring in place correctly on inner lid.
Leaking from under lid.	Food or debris under sealing ring.	Remove the sealing ring, clean and replace.
	Lid not correctly closed.	Open and reclose the lid, checking for correct closing.
	The pressure level inside of the appliance is abnormal.	In this case the safety valve will be releasing steam. Take the appliance to your Philips dealer or a service center authorized by Philips.
	Sealing ring broken.	Replace the sealing ring.
Leaking from floater	Food or debris under sealing ring.	Remove the sealing ring, clean and replace.
Floater does not rise	Food&water are below minimum level.	Add food/water. Make sure there is enough food and water in the inner pot.
up after the appliance starts pressurizing.	Leaking from lid or pressure control valve.	Take the appliance to a Philips service dealer.
E3 displays on the screen.	The temperature inside the inner pot is too high.	Wait until it falls down to room temperature.
E1, E2, or E4 displays on the screen.	The electric pressure cooker has malfunction.	Take the appliance to a Philips service center.
