

V364G

6 ELEMENT VHF CH6-12 ANTENNA

The Radio Parts V364G represents the ideal antenna for most Australian households*. To show our confidence, we offer a Lifetime Manufacturer warranty! The V364G is an Australian-made 6 Element VHF Yagi antenna design, delivering higher quality (MER) when compared to competing Log Periodic designs.

The 4G LTE 652MHz low pass filter is designed to block out mobile phone interference. LTE interference is one of the most common TV issues in Australia. The elements are composed of 12.7mm Aussie heavy duty extruded aluminium, giving this antenna greater strength and durability. Installation is fast and simple, thanks to the Snap Lock design.

Is This The Right Antenna For You?

*To be certain that a VHF antenna is ideal for you, go to the Government's MySwitch website (myswitch.digitalready.gov.au), input your suburb and click on 'See your available channels'. If your required TV channels are VHF (frequencies between 177.5MHz and 226.5MHz), then we're confident that this is the right antenna for you. Still not convinced? Then shoot us an email or give us a call and we'll be glad to assist.
